# CHANGING WORLDS: FACTFULNESS, SOCIAL BEHAVIOUR & THE FUTURE

**PETER MCGREGOR**

CINNG, CORNWALL & ISPA

This will not be a standard research seminar. Instead, inspired by ISPA's exhortation "Eu vou mudar o mundo", this seminar will link 3 things influencing change, starting with the global and ending with the local. 1) Factfulness – a brief introduction to a way of assessing what needs changing. 2) Social behaviour - a look at a new UNEP approach to conservation incorporating social behaviour into a migratory species convention. 3) Future - a local development combining volunteering, well-being and environmental action. Examples will range from gorillas and elephants to invasive species via bubble graphs and microlights.
