DOUTORAMENTO
2019**

29 MAI

14:00H - 17:00H

SALA DE ATOS

INSCRIÇÃO: UE@ISPA.PT

Alunos de Doutoramento do ISPA - Grátis
Outros - 150€

Limitado 15 participantes

AFTERNOON: A BRIEF INTRODUCTION TO WORKING WITH R

R is a free, open source, cross platform language and environment for statistical computing and graphics. It has rapidly become the industry standard for science. It also has a reputation for being more difficult to use than menu-driven stats packages such as SPSS. This workshop is a briefing for those who have not used R, but who want to know why it is so popular. It will begin by explaining what R is, how it differs from commercial packages and how it can be used with postgraduate students. It will then guide those who wish to try working

with R from the initial stages of setup, through basic examples, to become familiar with the way you work with R.

Prerequisite - to take part in the working with R section, you will need your personal laptop.

Format - short introductory lecture, guided practical setup and use workshop/individual advice.

PhD

**PETER
MCGREGOR**

PROFESSOR OF ANIMAL BEHAVIOUR,
